

Water Rejuvenation for a Better Tomorrow

Thane • Published: 03 Dec 2025 • Source: www.pratapsarnaik.com

In our culture, “*Water is Life*” is not just a belief—it’s our way of living.

Today, as the water crisis grows, conservation and reuse have become more important than ever.

Taking this need seriously, a major initiative to **revive and rejuvenate old wells** in the Lokmanya Nagar area of the Ovala-Majiwada Assembly Constituency has been undertaken.

Wells at **Morewadi Chawl Laxmipark Phase-1, Shankarmandir, Lokmanya Nagar Pada No. 2 Railway Colony, and Lokmanya Nagar Pada No. 4** have been restored with fresh life.

Under this effort:

- **36 out of 70 old wells in Thane** were cleaned
- Silt was removed, and **natural water springs were reactivated**
- **RO plants** have been installed to ensure clean, potable water for citizens

This initiative, with a dedicated allocation of **₹50 crore**, will significantly help address local water scarcity and provide reliable drinking water to thousands of residents.

A step towards sustainability. A step towards safeguarding our future.
